DATE MAILED: 12/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/027,664	<b>Applicant(s)</b> SOLOMON ET AL.	
	<b>Examiner</b> Igor Borissov	<b>Art Unit</b> 3639	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1,3-6,8-11,13-15 and 35-51 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1, 3-6, 8-11, 13-15 and 35-51 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Response to Amendment***

Amendment received on 8/31//2005 is acknowledged and entered. Claims 2, 7, 12, 16-34 have been canceled. Claim 1 has been amended. New Claims 35-51 have been added. Claims 1, 3-6, 8-11, 13-15 and 35-51 are currently pending in the application.

### ***Claim Rejections - 35 USC § 112***

**Claims 36-51 are rejected under 35 U.S.C. 112, second paragraph**, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36 recites (last paragraph): "waiting, by the computer system, for reception of a second transaction record from the organization including second transaction data describing completion of the second transaction", which is confusing. So as the "reception" step is not positively claimed, it is not clear is said "reception" step is a part of the recited method, or not. The remaining Claims are rejected as being dependent on Claim 36.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 36-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Walker et al. (US 2002/0169664).**

Walker et al. (Walker) teaches a method and system for providing offers using a billing statement, comprising:

**Claim 36.**

Receiving electronically, at a computer system, a first transaction record from an organization, the first transaction record being received according to a first protocol, and the first transaction record having a first format and including first transaction data stored in the first format and describing a completed first transaction between the organization and a customer [0033];

converting, by the computer system, the first transaction data from the first format into another format [0048];

accessing, by the computer system and based on information in the first transaction record, a first business rule configured by the organization and describing a second transaction expected to be completed between the organization and the customer in response to the completed first transaction [0192]; [0155]; [0157];

waiting, by the computer system, for reception of a second transaction record from the organization including second transaction data describing completion of the second transaction [0033].

**Claims 37-38.** See reasoning applied to Claim 36.

**Claim 39-40.** Receiving the second transaction record from the organization, the second transaction record being received according to the first protocol, and the second transaction record having the first format and including the second transaction data stored in the first format and describing a completed second transaction between the organization and the customer [0033];

converting the second transaction data from the first format into the another format [0048];

determining whether the first business rule is satisfied by the second transaction data; and informing the organization of whether the first business rule is satisfied [0192]; [0155]; [0157].

**Claim 41.** Receiving a third transaction record from the organization, the third transaction record being received according to the first protocol, and the third

transaction record having the first format and including the third transaction data stored in the first format and describing a completed third transaction between the organization and the customer [0033];

converting the third transaction data from the first format into the another format [0048];

determining that the third transaction is an unexpected (additional) transaction, an unexpected (additional) transaction being a transaction that is expected to succeed a given transaction that has not been completed; and informing the organization that the third transaction is an unexpected (additional) transaction [0192]; [0155]; [0157].

**Claim 42.** Receiving a third transaction record from another organization, the third transaction record being received according to another protocol, and the third transaction record having another format and including third transaction data stored in the another format and describing a completed third transaction between the another organization and another customer [0033];

converting the third transaction data from the another format into the another format [0048];

accessing, based on information in the third transaction record, a third business rule configured by the another organization and describing a fourth transaction expected to be completed between the another organization and the another customer in response to the completed third transaction [0192]; [0155]; [0157];

waiting for reception of a fourth transaction record from the another organization including fourth transaction data describing completion of the fourth transaction [0033].

**Claims 43-44.** Receiving the fourth transaction record from the another organization, the fourth transaction record being received according to the another protocol, and the fourth transaction record having the another format and including the fourth transaction data stored in the another format and describing a completed fourth transaction between the another organization and the another customer [0033];

converting the fourth transaction data from the another format into the another format; determining, by the computer system, that the third business rule is satisfied by the fourth transaction data [0048];

accessing, based on the third business rule being satisfied, a fourth business rule configured by the another organization and describing a fifth transaction expected to be completed between the another organization and the another customer in response to the completed fourth transaction [0192]; [0155]; [0157];

waiting for reception of a fifth transaction record from the another organization including fifth transaction data describing completion of the fifth transaction.

**Claims 45-47.** See reasoning applied to Claim 36.

**Claims 48-51.** See reasoning applied to Claim 36. Information as to the specifics of the organization cannot change the method steps recited, therefore cannot distinguish said method steps from the prior art in terms of patentability.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Gharavy (US 2003/0004840).**

Walker teaches a method and system for providing offers using a billing statement, comprising:

**Claims 1, 6 and 11.**

Providing business rules which are configured by a market participant (user) [0155];

receiving offer including a transaction-related information (portion) and specified amount which is to be charged during said transaction if said offer is accepted (expected related response portion) [0033];

converting said information from a first format to another format [0048];

receiving information related to an acceptance for the offer (expected related response) [0157];

matching information related to an acceptance (expected related response) with alternative offer related to the same transaction (transaction-related portion) [0157];

determining whether said received information satisfies at least one configurable business rule [0192], wherein the configurable business rule specifies a relationship between the received business transaction and the subsequent business transaction [0192]; [0155]; [0157];

establishing information related to subsequent business transaction based on said determination [0192]; [0155]; [0157].

Walker does not specifically teach *validating said information related to at least on business transaction; communicating to the first market participant validation results of said at least on business transaction; and enabling the market participant to track a status of said information related to the business transaction and the subsequent business transaction*. Also, Walker does not specifically teach that said another format is a *standard* format.

Gharavy teaches a method and system for performing collective validation of credential information, wherein:

credential data of a transaction is *validated* [0025]; [0105];

during said validation said data is *converted* in the format usable by the rule engine, for example *standard format* [0025]; [0105];

*tracking* information related to said credential data [0030].

Furthermore, Gharavy teaches that the transaction is approved based on the successful validation results, thereby indicating *communicating to market participants validation results of said at least on business transaction* (Fig. 4; [0125]).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Walker to include validating said information related to at least on business transaction; and tracking information related to said credential data, as disclosed in Gharavy, because it would advantageously enhance accuracy of the system, and make it more secure. And it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Walker to include that said data is converted in the standard format, as disclosed in Gharavy, because it would advantageously simplify the processing of said data.

**Claims 3, 8 and 13.** Walker teaches said method and system, wherein the configurable business rule is configured based on at least one of a jurisdiction associated with the received business transaction, a time relationship between the received business transaction and a subsequent business transaction, and a business event associated with the received business transaction [0162].

**Claims 4, 9 and 14.** Walker teaches processing business transactions representing different formats [0048].

**Claims 5, 10 and 15.** Walker teaches rejecting a requested transaction if this transaction does not satisfy business rules [0093].

**Claim 35.** Walker in view of Gharavy teaches all the limitations of Claim 35, except specifically teaching a second processor configured to access the processor. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Walker and Gharavy to include a second processor configured to access the processor, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

***Response to Arguments***

Applicant's arguments with respect to Claims 1, 3-6, 8-11, 13-15 and 35-51 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Igor Borissov whose telephone number is 571-272-6801. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hayes can be reached on 571-272-6708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
